

Guided Wave Acquires Optical Solutions

Optical Solutions SMART Photometers

ChemViewMx™

**Simulplex
ChemView™**

Guided Wave has acquired by merger Optical Solutions, a leading supplier of process photometers, diode array spectrophotometers and sample probes for use in UV/VIS/NIR. "Optical Solutions brings Guided Wave an excellent photometer product line and a strong team of experts in process analytical system development, engineering and support", states Dr. Roger Schirmer, Guided Wave's President.

Optical Solutions UV/VIS and VIS/NIR patented SMART Photometers™ include: ClearView™, MiniView™, ChemView™, Simulplex™, and ChemViewMx™.

This product line extends Guided Wave's long-history of expertise in on-line NIR spectrophotometers and proven process client/server software with Optical Solutions lower-cost, easy-to-use process photometers, where the application does not demand complete spectral analysis and chemometrics multivariate calibration methods.
